

Certificate of Compliance - RoHS Declaration

From the beginning, SemiSouth Laboratories has been dedicated to releasing environmentally responsible products while maintaining the highest quality and performance. This certificate documents our compliance with the EU Directive 2002/95 for the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2008 (RoHS Regulations) of the European Parliament and of the Council 27 January 2003. Products under RoHS compliance are limited in the allowable PPM for the following substances:

| Substance | Maximum Limit (PPM) |
|----------------------------------------|---------------------|
| Cadmium (Cd) | 100 |
| Lead (Pb) | 1000 |
| Mercury (Hg) | 1000 |
| Hexavalent Chromium (Cr6+) | 1000 |
| Poly Brominated Biphenyls (PBB) | 1000 |
| Poly Brominated Diphenyl Ethers (PBDE) | 1000 |

In 2008, SemiSouth completed conversion of all standard products into RoHS compliance, and continues monitoring our supplier and subcontractors for conformity to the RoHS directives. Although all efforts will be made to supply only RoHS components, SemiSouth reserves the right to supply certain customer requests with legacy or custom products that are not technically practical or cannot be obtained through our suppliers while maintaining RoHS compliance.
